However, Woodward also notes that "the real new-school features of AutoCAD 2017 are in the form of a major change in the user interface: the ability to simultaneously display multiple windows of AutoCAD data on the screen." This ability to simultaneously display multiple windows of AutoCAD data on the screen is referred to as tabbed design in AutoCAD 2017. A bill that would impose new restrictions on marijuana businesses in Pennsylvania is now in the hands of the House of Representatives, where it is unlikely to become law. But that hasn't stopped some prominent conservatives from openly criticizing the measure, which opponents call an anti-marijuana "panic bill." "The current marijuana debate is indicative of a culture that is seeing, listening to, and acting on false information, and these panic bills are an extension of that culture," former Pennsylvania Attorney General, Tom Corbett, told Marijuana Moment, when asked about House Bill 2122. "I am not a marijuana user," Corbett said. "It is a sacred herb for me, and I support the legalization of medical marijuana, but we should always be aware of what's in the water." "You know, I think the argument against that has nothing to do with legalizing marijuana at all," he added. "It has to do with making sure that whatever is being produced here is being done in a safe environment." That argument is a familiar one for cannabis opponents, who often point to all sorts of alleged dangers associated with marijuana use. Perhaps the best-known scaremonger is the attorney who was fired in 1999 after writing an editorial for a newspaper that stated that marijuana use could cause a "seizure" or lead to "complete or partial loss of consciousness"
