The program was originally a spinoff of AutoDesk, a wholly owned subsidiary of Autodesk, Inc., based in San Rafael, California. At its peak, it had over 3.2 million users in 1998, which was 50% of the professional market.[1] AutoCAD was originally intended for use by architects and engineers, and was not intended to directly compete with other CAD programs. In 1998, the company was purchased by San Rafael, California-based software company Autodesk for \$2.4 billion, doubling the company's annual revenue, which had been \$400 million at the time.[2] After the acquisition, the CEO of Autodesk, Don Snyder, was named CEO and chairman of the board of Autodesk and released AutoCAD under a new, joint licensing model with additional premium features that were previously only available to Autodesk customers.[3] In 2006, the company launched AutoCAD LT, a less powerful, freeware predecessor to AutoCAD. In 2010, the company released a new more powerful AutoCAD LT 2015. AutoCAD 2010 is the latest version of the software. AutoCAD, which was first introduced in 1982, is also available in a stand-alone web app. In 2015, AutoCAD LT 2015 was discontinued and replaced by AutoCAD 2016. It also became freeware. AutoCAD 2016 is the latest version of the software. The software was developed by a different team of Autodesk employees than the team that developed AutoCAD 2015, including Autodesk employees who used it at home.[4] The success of AutoCAD and other similar products like Dassault Systemes' CATIA and Microstation, all of which are suites of several CAD-related applications, has led to the development of other, more specialized CAD programs, like Inventor by Dassault Systemes and Vectorworks by Vectorworks. History [ edit ] Precursor [ edit ] AutoDesk's predecessor, Autodesk, Inc. (originally called Data Design), was formed by computer engineer Ben Shneiderman on January 3, 1974.[5] In the summer of 1974, Autodesk created the AutoLISP language on the DEC PDP-10 to run on a personal computer. The language was inspired by the author's job as a draftsman. However, there were few applications written in AutoLISP and the

Autodesk also offers AutoCAD Architectural Desktop and AutoCAD Electrical Desktop which are a single package with AutoCAD.
