Visual LISP is one of two LISP variants supported by AutoCAD, the other being AutoLISP. Visual LISP was also the base of AutoLISP, and, as such, is very similar to Visual LISP. In order to use Visual LISP in AutoCAD, the AutoLISP package must be installed on the system. Visual LISP is still supported for certain tasks that AutoLISP can no longer perform. A recent AutoCAD R13 update added full support for Visual LISP in AutoCAD. VBA, Visual Basic for Applications is a programming language that allows users to add and customize applications written in any application language (such as AutoCAD), into Windows applications. It was originally designed to work with Excel, but has since been integrated with other Microsoft Office applications, including Word, PowerPoint, and Access. It is now only accessible by opening AutoCAD as an MDI (Microsoft Document Interface) application and the Autodesk VBA development environment to create AutoCAD objects in VBA. Many VBA objects are also available through AutoLISP. ObjectARX is an extension to AutoCAD. It is based on the ObjectARX language by Fabrikam. ObjectARX is an extension to the programming language ObjectARX and is a scripting language for AutoCAD. AutoCAD is used for free in some schools and colleges in India for drawing education. Video game development AutoCAD is used in game development, though not commonly. Using its features can speed up game development, though, especially in the modeling and rigging areas. The software can be used in games that are played on platforms like the PlayStation Portable and Xbox 360. CAD/CAM software Some manufacturers and software developers have software that integrates CAD/CAM functionality. Some of these include: Acute Creations GEI Software Komplex Manufacturing Solutions Syneron Inc. Vocational education AutoCAD has been licensed to several vocational schools, such as: ITT Tech. In 2009, ITT Tech in Amherst, Massachusetts, was the first school to license AutoCAD, in part due to the success of a nationally sponsored math contest in which students enter a creative design challenge in AutoCAD. Cefixime, a new oral cephalosporin, was compared with cefaclor, amoxicillin and trimethoprim/sulfamethoxazole in vitro for antimicrobial activity against 11 strains of group B Streptococcus. All strains were inhibited at concentrations of 2.0 to 8.0 micrograms/ml. Cefixime was more active than cefaclor against Streptococcus agalactiae, but similar in activity against group B Streptococcus, Streptococcus bovis and Streptococcus milleri. At 4.0 micrograms/ml, both amoxicillin and cefixime were more active than trimethoprim/sulfamethoxazole against all strains.
